

The Cerner® Experts for over 20 years

Nice to meet you.

At Softek, our team of Cerner® Millennium™ experts and software developers bring knowledge beyond the ordinary to every client. Our consultants are helping hospitals across North America.

Softek delivers a full suite of software solutions and consulting services to assess and optimize EMR system performance, including revenue cycle integrity and patient accounting.

Our Mission

To help hospital systems get the most out of their investment in Cerner® Millennium™.

Our Vision

To deliver innovative solutions to complex problems by leveraging software and industry expertise.

Expert Cerner® Consulting

Softek's Revenue Consultants have worked with dozens of Cerner® hospitals and have found missing revenue at each one, whether they went live months or years ago.

Softek charges a relatively small fee compared to the revenue we collect. We got a significant multiple on the fee we paid. After our big go-live with Cerner, we had a small dip in revenue and then quickly recovered all of it.

“

The only thing I would do differently with Softek would be to engage them on the system build months earlier. I wish I had found Softek earlier.*
